

PROALHO CAV

Nucleus for Beef and Dairy Cattle

INDICATIONS FOR USE:

PROALHO CAV is a mineral Nucleus intended for Beef and Dairy cattle in the breeding, rearing and fattening phases, containing Garlic Aroma.

BENEFITS:

TO THE ENVIRONMENT (BIOCONTROL)

- Helps balance spraying handling
- Promotes balance among populations of ticks, horn flies, and larvae in the animals
- Preserves the environment

TO THE HUMAN HEALTH AND FOOD SAFETY

- Reduces the risk of illnesses caused by continuous spraying of poisons in rural workers, rural producers, their families and consumers
- It does not cause residual effects in meats for human consumption

Guarantee levels per kg of product:

Description	Guarantee	Unit
Sulfur (minimum).....	198.0000	g/kg
Garlic Aroma (minimum).....	2,000.0000	mg/kg
Saccharomyces cerevisiae (minimum).....	3.7500x10E11	cfu/kg
Ruminobacter amylophilum (minimum).....	1.5000x10E10	cfu/kg
Ruminobacter succinogenes (minimum).....	1.5000x10E10	cfu/kg
Succinobacter dextrinosolvens (minimum).....	2.2000x10E10	cfu/kg
Bacillus cereus (minimum).....	1.7500x10E10	cfu/kg
Lactobacillus acidophilus (minimum).....	1.7500x10E10	cfu/kg
Enterococcus faecium (minimum).....	1.7500x10E10	cfu/kg

HOW TO USE:

- Mix 500 grams of PROALHO CAV in one bag of 25 kg of mineral supplement, preferably in covered troughs.
- Mix 4.0 kg of PROALHO CAV in one ton (1,000 kg) of feed and after mixing give the final product in the proportion of 1.5% of the animals' weight per day. Always maintain a good availability of the roughage for the animals, whether in the form of pasture and /or alternative roughage such as: fresh chopped sugar cane, fresh chopped napier, silages, grass hay.
